## SUMMARY

iOS engineer with 2+ years of experience building production apps in Swift. At Inspire Dev Studio I work on CapCap, a video captioning app on the App Store, handling the iOS client and the backend services it depends on.

## SKILLS

**Core:** Swift, SwiftUI, UIKit, MVVM, Core Animation, AVFoundation, App Attest
**Familiar with:** Node.js, TypeScript, Express, Firebase, PostgreSQL, Prisma, Redis, BullMQ, Socket.IO, Kotlin, Python
**Tools:** Fastlane, GitHub Actions, Crashlytics, Mixpanel, Amplitude, Superwall, Figma, Claude Code, Codex

## EXPERIENCE

### Software Engineer (Founding Engineer) | Inspire Dev Studio | Delhi | July 2024 - Present

- Developing **CapCap** (capcap.in), an automatic subtitle, caption and dubbing generator. Built its animated caption engine, shared by live preview, video export and the template gallery, so exports match the editing experience.
- **Optimized editor launch time by ~60%** on long projects by removing redundant redraws and deferring setup. Rebuilt projects as a **multi-track** timeline for multi-clip editing and separate original and dubbed audio.
- Built **"Behind You" captions** with **Apple's Vision framework** to place text behind detected speakers. Maintained **99.8% crash-free users** across frequent releases.
- Built CapCap's AI captioning and dubbing backend with **Node.js** and Firebase Cloud Functions for transcription, translation, timed voice dubbing, voice cloning and music separation. Protected APIs with **App Check**, an **App Attest fallback** and rate limiting.
- Built **HeapChat** (heap.chat), a multilingual support platform in production as CapCap's **in-app support**. Implemented **Socket.IO** messaging, BullMQ/Redis jobs, PostgreSQL/Prisma, Cloudflare R2 and APNs, and delivered its iOS and web SDKs, Next.js dashboard and SwiftUI admin app.
- Led **EasilyTranslate**, a SwiftUI **Mac app** that translates String Catalog, Android, JSON and Markdown localization files while preserving formatting, placeholders and comments.

### App Developer Intern | AppSuccessor Media Pvt Ltd | Noida, UP | September 2023 - June 2024

- Contributed to **Soundscape**, a wellness app featuring soothing music playback, podcasts, and guided meditation with **10K+ downloads**. Built the **iOS app** from scratch using **SwiftUI** with **MVVM architecture** and refactored the Android app in **Flutter** following best practices which reduced bugs by 50%.
- Developed **Trakeat**, featuring water logging, exercise tracking and calories tracking in **compose** with **Firebase authentication**, Firestore, Room DB, Koin, and Retrofit.

## AGENTS

### Claude Code, Codex, Cursor

- Directed **AI coding agents** across codebases using repo-specific architecture and coding guidance. Broke down work for sub-agents while retaining ownership of architecture and reviewing changes.
- Connected **Mixpanel and Amplitude through MCP** to inspect funnels, retention and drop-offs during feature development.
- Developed and iterated screen designs in **Figma and Paper through MCP** as part of the product workflow.
- Exploring local LLMs and agent harnesses to understand their capabilities, reliability and limits.

## INVOLVEMENT

### Open Source Contribution | GitHub

- Contributed to **Exyte's Chat and MediaPicker SwiftUI libraries**, adding new features and stability improvements. Highlights include, integrating Kingfisher-based image caching in Chat (PR #215) and improving camera handling in MediaPicker (PR #39).

## EDUCATION

### B.Tech - Computer Science and Engineering | IMS Engineering College, AKTU | 2020 - 2024
